No Senseless Behavior

Challenging behaviors are not just a reflection of some emotional or social disturbance in a child. They are a symptom of an unsolved problem, often related to unmet needs or a lack of skills and resources. Therefore, we must focus on what a child needs, instead of what an adult or system demands. This session helps us see challenging behavior as an opportunity to teach alternative ways for a child to get their needs met.

Teaching Self-Regulation to Young Children

Self-regulation skills are necessary for consistent performance, behavior and school readiness. Without them, a child may experience a life of chaos characterized by explosiveness, violence, anxiety, substance abuse, impulsivity, hyperactivity, distractibility or mood disorders. This session examines self-regulatory functions through developmental lenses and offers proven strategies to develop and strengthen them.

9:00am– 3:00pm

Lunch on your own 12pm-1pm
